

Keep Your Personal Space **Clean & Safe**

FreshAir Personal

- Reduces airborne contaminants and allergens
- Requires no fans, filters or maintenance
- Lightweight, easy to use and rechargeable

With more reasons than ever for preventing germs and contaminants from invading our lives, The **FreshAir Personal** creates an almost particle-free zone around you. By generating high intensity ion streams that add charges to nearby airborne particles, these charged particles repel each other and adhere to surfaces out of your breathing zone. No larger than a credit card, the **FreshAir Personal** easily hangs from your neck or just clip it on clothing. Developed by NASA with certified Space Technology.
